

RECOMFLEX

HIGHLY FLEXIBLE HOSE FOR VACUUM CLEANING.

DESCRIPTION :

Recomflex is a Spirallock vacuum hose in a high quality polyethylene-EVA blend. Ideally suited for commercial and industrial vacuum cleaning and suction systems, due to its smooth interior and excellent flexibility.

CHARACTERISTICS :

HIGHLY FLEXIBLE : the all plastic interlocking construction allows an outstanding flexibility together with an extremely long flex life.

SMOOTH INTERIOR : assures maximum flow.

CRUSHPROOF : the non-wire construction allows this hose to be crushed, kinked, jumped on, twisted or driven over with a truck and it comes right back to shape.

EXCELLENT RESISTANCE TO AGEING AND CHEMICALS : Inert to ozone and the stress of continual movement or vibration. Resistant to attack from most mineral oils, acids and alkalis, not to be used in transferring gasoline, oil solvent or kerosene.

TEMPERATURE : -40°C to +60°C. Even freezing cannot crack or damage the hose.
